Plexi-Ch'Art 2013

Superimposition

Let's take a transparent material, the plexiglass.
Finely add UV opaque ink.
Give to this object an organic shape, softly riding the colors' wave.

Integration

Now we lay it on a white wall, smooth but still full of the signs of the mortar, of paint, of the roller that whitened it.

Emotion

Look at the room,
filled with the vivid breeze
of an embossed fresco,
just as an emotional
reinforcement.

Relation

Every space wants
its own Ch'Art.
Respectfully reminding
colors to colors.
Naturally reflecting
the function in the image.
Call to action easily arises
by the form itself.

Innovation

The Ch'Art Design plexiglass panels are made one at the time using the latest digital technologies, from the graphic design to the manufacture.

Technical specs

The panel is fixed to the wall with aluminum spacing plugs: loop (photo 1, 2 & 3) or externals (photo 4 & 5).

Material:
Plexiglass 5 mm

Print:
Inkjet UV on back side

Modellazione:
Mill shaping

Measures:
Max: 200x300 cm

Position

Rotate your ch'Art as you like

The recipe

Image

Ch'Art subjects are produced as unique ones or limited edition. You can choose among the existing ones by shape, colors and size, or else ask for an exclusive design to suit your needs.

Printing technology

Plexi-Ch'Art panels are produced using inkjet digital printing, one piece at the time upon request. We work with flatbed printers, able to receive any media for direct inking.

Ink

We print with UV curable inks, whose peculiar density ensures full and vibrant colors in every hue. These inks are polymerized in the printing stage, becoming extremely resistant both in indoor and outdoor environments.

Media

Plexi-Ch'Art are printed on 5 millimeters thick transparent plexiglass sheets. The material perfectly lends itself to print and to subsequent shaping, while maintaining high durability and safety skills.

Finishing

The printed sheet is shaped with a digital controlled milling machine. The edges dulled by milling reinforce the panel's dimensionality, softly clashing it from the background. Panels can be mounted with high strength spacing bolts.

What is **Ch'Art** DESIGN?

The spirit of Ch'Art

A Ch'Art is a 360 degree **interpretation**:

Colour and **shape** give life to a continuous **dynamics** that stimulates the observer's imagination in a wholly subjective way.

Size and **positioning** are molded to the environment, integrating what is with what is best.

The **media** to which they grip on and the **technologies** that allow it mix tradition and innovation, mastery and uniqueness for applications in any area.

Giving life to a Ch'Art is a matter of **style**, **experimentation** and **evolution**.

Together we can blend all this to get something unique.

Colors

There are a lot of Ch'Art creatures, and new ones will be born every day. The most prolific tribes can be distinguished by the color of the blocks:

Rainbow Ch'Arts show every color of the iris, a seamless flow from one shade to another.

Selected Ch'Arts born with two or three basic colors, creating mergers and chiaroscuro illusions.

Dark Ch'Arts mix stylish composite blacks, joining some warm ones with cold others.

Choice
